Bot Commands

Command	Purpose
/start	Onboarding and quick help
/lead	Capture name, email, and message
/faq	Answer common business questions
/status	Return order or request status
/export_leads	Admin-only lead CSV export

Handoff Checklist

- `.env.example` included for bot token and admin configuration
- Lead validation rejects bad email and empty messages
- Service tests run without calling Telegram
- CSV export is simple enough for Google Sheets or CRM import

Scope Notes

- Uses user-owned Telegram Bot API credentials.
- Does not automate spam, scraping, or unsolicited outreach.
